

The logo icon consists of a square divided into four quadrants. The top-left and bottom-right quadrants are dark blue, while the top-right and bottom-left quadrants are a lighter blue. Two white circular lines are overlaid on the square, forming a stylized infinity symbol or a continuous loop.

KW200

Work Smarter, Use Your Knowledge

KW200

Work Smarter, Use Your Knowledge

Have you ever wondered where the latest price list or product brochure is? Do you struggle to access the information you require when working out of the office? Are you looking for ways to make your workforce more efficient?

Gain complete control over all the documents across your network and within Sage 200 with KW200.

KW200 is a simple and easy to use Electronic Document Management System (EDMS) which allows you to gain complete control over your companies' documents. Including full version and access control you can ensure your teams are working from the latest information at all times and access to confidential documents can be restricted.

Fully integrated with Sage 200, KW200 allows you to capture and index any electronic document from within Sage 200 or from across your network. This allows you to store and archive information centrally against your core data, instantly reducing the need for paper copies.

Complete with an intelligent workflow tool KW200 enables you to move information around your business automatically ensuring that business process are dealt with promptly and can be tracked.

With its powerful, yet flexible search function our clever software can minimise the time spent searching for documents making your workforce instantly more efficient.

Also accessible via your web browser KW200 makes it easy for an ever increasing mobile workforce to access the information they require whilst working off site and can be used without purchasing additional Sage 200 licenses.

Out of the box, the KW200 solution allows you to:

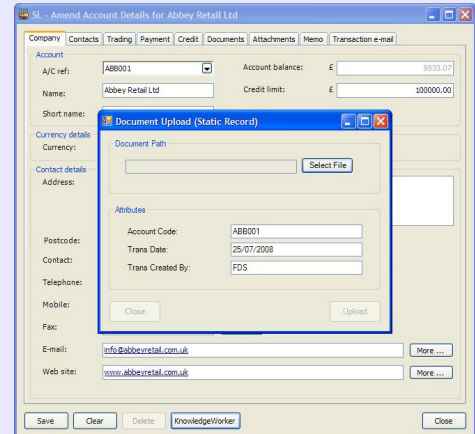

- Index, classify and search on all documents – including outputs straight from Sage 200.
- Perform this from within Sage 200 or alternatively via any internet web-browser without the need for additional Sage 200 user licenses.
- Find related information based on a large number of analysis points. For example:
 - Order Number
 - Customer Reference
 - Project Number
 - Stock reference
- Fully integrate with Microsoft Outlook, Word and Excel as standard making KW200 easy to use.

Store files centrally against Sage 200

You can upload any file to many options within:

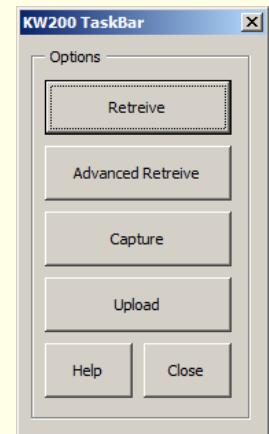

- Sales Ledger
- Purchase Ledger
- Nominal Ledger
- Cash Book
- Sales Order Processing
- Purchase Order Processing
- Stock Control
- Project Accounting

The KW200 TaskBar forms part of over 100 options and screens within Sage 200.

From the KW200 TaskBar you can:

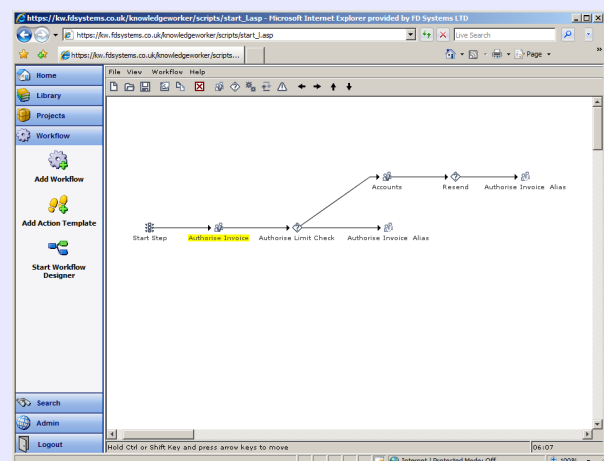

- Add any file to Sage 200
- Scan and attach files to Sage 200
- Begin workflows such as Purchase Invoice Approval
- View Sage 200 printed outputs
- Find any document just from keywords using powerful search functionality

Workflows and Business Process Management as standard

Enhance your KW200 system with our optional Workflow Designer or benefit from our standard fully integrated Workflows designed to help your business.

- Purchase Invoice Approval
- Purchase Order Authorisation
- Sales Orders on Hold
- Returns Management

The benefits of KW200 are instantly obvious.

With its simple yet powerful Sage 200 user interface KW200 will provide you with a feature rich Electronic Document Management System (EDMS) fully integrated with your Sage 200 system to help you achieve efficiency and control of the information stored within your business.
