

Bar Coding Solutions for your Business... Integrated into Sage Software

The Datalinx Warehouse Manager Solution

The Datalinx Warehouse Manager solution brings the power of Sage right into the warehouse operative's hands. Tasks traditionally carried out by a combination of warehouse and office personnel, such as purchase order receipting and sales order picking; often involve delays and a lengthy paper chase. When the Datalinx Warehouse Manager solution is implemented into an organisation these delays are removed.

The introduction of the Warehouse Manager solution into a warehouse will streamline and accurately manage warehouse tasks. An organisation that handles a volume of stock without a bar code based warehouse management system, will typically have a stock location accuracy of 75%, even though physical stock levels will be reasonably accurate.

The Datalinx Warehouse Manager solution can deliver a stock location accuracy approaching 100%, providing an improvement in efficiency of approximately 25%. This is just one of the reasons why users are quoting a return on investment in less than 12 months.

Warehouse Manager fully integrates into Sage Line 200, Line 500 and Sage 1000, ensuring that warehouse personnel, via their wireless hand held readers, and office personnel, on their central Sage business system, see common data. The availability of accurate information provides staff with the confidence to complete daily tasks. Manufacturing and delivery dates can be accurately predicted, enabling a higher level of service to be given to customers.

The Datalinx Warehouse Manager solution takes the four fundamental processes of warehousing; receiving stock, moving stock, issuing and dispatching stock and counting stock, delivering efficiency and time savings to all areas. Implementing the Datalinx Warehouse Manager solution for Sage delivers proven business processes direct to the mobile operators.

Receiving Stock

- Goods receipt numbering (GRN)
- Purchase order receipting
- Works order receipting
- Production receipts
- Production returns
- Customer returns

Issuing/Dispatching Stock

- Automatic dispatch confirmation
- Works order picking

- Pick-face replenishment
- Bin-to-bin transfers
- Bulk put away

Counting Stock

- Warehouse Manager stock take
- Perpetual stock take
- Ad hoc stock take
- Annual stock take
- Sage stock take
- Stock enquiries

Hardware

The Datalinx Warehouse Manager solution utilises the latest 802.11x wireless bar code technology, delivering the efficiency that warehouse and office personnel require. Wireless bar code readers are available in a range of varying designs. These include hand held and vehicle mounted terminals. In addition to this there are a number of keyboard, display and scanner options ensuring the correct hardware is supplied for specific businesses requirements.

About Datalinx

Datalinx develop software solutions that integrate into Sage Line 50, Line 100, Sage MMS, Line 200, Line 500 and Sage 1000 and have been supplying the Sage marketplace for the last decade. In this time, Datalinx has become recognised as the leading provider of bar code based solutions for Sage.

Datalinx have the capability and knowledge to guide and advise a business in all aspects of the project implementation process, including recommendations on the best procedures and practices that should be deployed within an organisation's business environment. Datalinx demonstrate and supply the latest hardware, wireless LAN technology and bar code symbologies for use in conjunction with Datalinx software solutions.

Datalinx software solutions are written and developed exclusively by Datalinx, providing the capability to support and train users on all aspects of the software solution.
